# How to Complete Fillable PDF Forms on Mac Computers

This document provides instructions for how to complete fillable PDF forms on Mac computers. Adobe Acrobat Reader is required in order to use PDF Forms.

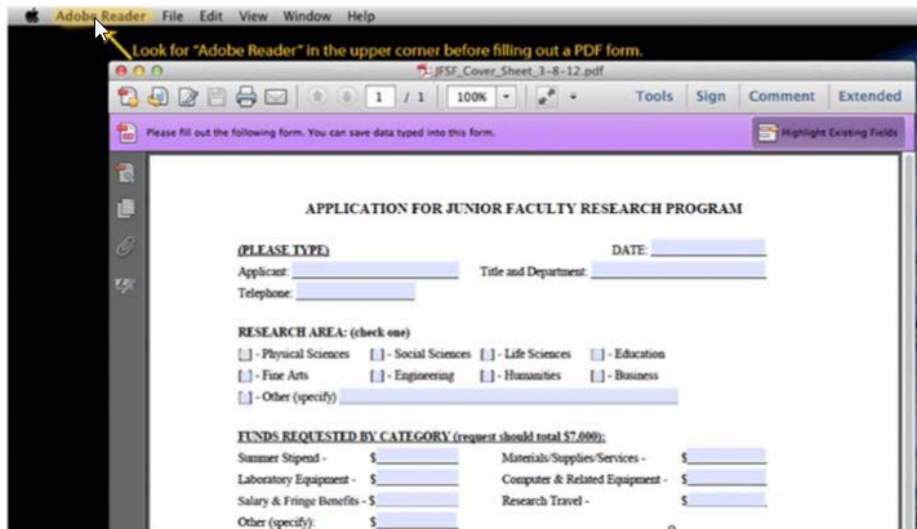

Mac users must install Adobe Acrobat/Reader. Mac Preview will not work with fillable PDF forms. Do not attempt to complete fillable forms within your internet browser.

OSX by default uses the application 'Preview' to render forms instead of Acrobat Reader. 'Preview' does not support PDF forms, therefore will not work while being used in this program.

Install the most recent version of Adobe Reader (<http://get.adobe.com/reader>)

Save the form to your local drive on your own computer and note the location of the saved file. (ex. Documents)

1. Open the Adobe Acrobat Pro/Reader application
2. On the Acrobat Reader menu, go to File>Open.
3. Open the file from the location in which you saved it. The form will not work if you simply double-click it, unless Acrobat/Reader is already your default PDF viewer.

4. Complete the form and save the changes before emailing or printing.
