Answer Sheet

General

1. c. Must have a 10.0 Start value. Additionally, must have at least 0.6 in total bonus (including both CV and DV) and the E element must be acro on beam or floor.
2. b. If she falls after being spotted, also deduct additional 0.5 for the fall! NEW
3. d. 7.925—averaging the 2 middle scores of 8.0 and 7.85
4. c. May recommend—but never force—a change of scores
5. f. All of the deductions are correct
6. b. Fail to remove board after mount 0.3 is correct. See p 8 General for the other deductions!
7. f. SV is required to be flashed at all Level 10 competitions. And if a score changes due to conference, it should be re-flashed.

Vault

8. c 0.1 New deduction—remember it—under rotation of salto vault is 0.1 deduction
9. d. Up to 0.1 for arm swings to maintain balance on landing
10. b. Early tuck on a salto vault is \wedge 0.3. The rest of the deductions listed are each \wedge 0.2
11. h. a), d) and e) are correct b) No safety zone is VOID, c) No deduction for coach between board & table on Yurchenko vaults.
12. f. 0.3. It's an up to 0.1 deduction for each phase of the vault.
13. e. Up to 0.3 for failing to arrive on table before approximately 45° from vertical
14. f. 0.2. See 6/7 Specific apparatus deduction chart on p 9 of Vault in written Code.

Bars

15. e. 10.0 plus 0.1 bonus. Cast HS hop is C, Weiler Kip is D, front Jaeger is D, so +0.2 CV. The Bail to HS is D and dismount is E, so she has 0.8 total in bonus for D/E and for CV. She has an E element, so +0.1 for bonus.
16. a. No deduction. She has a 3-6-7 in the Weiler kip (this is why I asked the question because it stumped me at first—but look it up, a Weiler kip is number 3.407). She also has a forward movement with the Jaeger. So 2/3 fulfilled.
17. b. Clarified by my TC (Linda Thorberg)—Hecht back salto counts for the Special Requirement because there is a salto in it. The value is D (8.408), and that's no deduction for dismount up to level
18. c. 0.1 She performed an isolated "E" (the Ray) and an isolated "C". Now, this doesn't fit the chart exactly, and perhaps you used judgement and said the E was special, so you took only .05. That's probably ok too... I put this question in to remind myself that the Ray is an "E"!
19. c. She receives 0.1 in additional bonus. Piked Jaeger is E, and she has 3 D's and 0.1 in CV, so a total of 0.6 in bonus
20. d. C + D + D, + 0.3 in CV. Use the middle element twice for bonus, so C+D +0.1 and D+D +0.2.
21. e. All of the above are correct
22. c. 0.5 0.1 for landing too close to bar. \wedge 0.3 for height of salto dismount. \wedge 0.1 for step
23. a. When off the bars, warning is communicated at "20 seconds remaining" and "10 seconds remaining". The others are false because fall time stops when gymnast leaves floor to remount, there's 45 second fall time on bars and gymnast may speak to her coach during fall time without penalty.
24. d. No Bonus is awarded, but Special Requirement and Value-Part credit are awarded. Each judge deducts 0.5.
25. d. She receives release element credit for both the straddle cut and the Giant hop full. No deduction from SV. (These are a couple exceptions that are considered flight elements for the JO program. Please read description carefully—a lot of people have been confused by this.)
26. b. Hit mat with feet is a flat 0.3 deduction. The rest are up to 0.3

Beam

27. e. All of the combinations fulfill the Special Requirement. (Note the slight change of wording about elements connected to B dismounts—p 18 Beam in the written Code)
28. b. 0.05. The only forward/sideward element is in the dismount.
29. c. Up to 0.1 Directional use for insufficient use of entire beam apparatus

30. b. Value is “B” See # 3.206
31. d. 9.9 Fulfills Special Requirements and Difficulty. +0.2 CV for Switch leap, switch leap. + 0.1 for acro series. 1 D for Aerial. (If she had connected the switch leap to the aerial she would have had the 10.0 Start Value. Remember, no +0.1 extra bonus unless there is an acro “E” on beam!)
32. c. 0.1 She has two “C’s” (the switch leg leaps) and look on the chart—that’s 0.1.
33. b. 0.05 She has a 2- element acro series with a “C” salto + one D acro flight. Look on chart—it’s .05 deduction
34. c. 0.1. She has a “C” dance connected to a “B” dismount. On the chart, this is 0.1 deduction.
35. b. 1 The only “A” is the 1-arm cartwheel. Everything else listed is a “B,” including the split leap which is new value
36. c. 0.3 No deduction for 1 second pause. 0.1 for the 2 second pause. 0.2 for more than 2 seconds pause
37. g. a), c) and d) are correct. You award the “C” value even if the first leg does not reach 45°
38. a. Large step on landing is a flat 0.2 deduction. Others listed are up to 0.2 deduction.

Floor

39. a. 0 She has B turn, and 3 C leap/jumps. (I had to remember that a switch leap ½ turn is a “C!”)
40. c. 0.1 On floor, there is just the 0.1 concentration pause deduction for 2 seconds (or more) pause.
41. d. 9.9 Has difficulty, Special Requirements, B turn and front and back tumbling. Bonus is 2 D’s and +0.2 CV
42. a. 0 Has D in 2 passes and B+C bonus in the other pass
43. a. 0 Ends with a D
44. e. 0.2 Has only B dance elements. Now, 3 B dance is not specifically on chart, but this deduction seemed correct to me. You can have a different opinion, but I think you’d still have a larger not smaller deduction.
45. b. Deduct 1.3 from SV for not having 3 different saltos, no C in last pass and for no attempt to perform last salto. Also deduct in composition 0.3 for no C salto, 0.1 for failing to perform saltos in 2 different directions, 0.1 for dismount not up to competitive level and 0.2 for acro not up to competitive level
46. b. 1 D and +0.2 CV. Adding a back handspring does not change the 2nd series, plus it’s the same “D” and she receives D value only once for the same element.
47. f. All of the above are correct
48. a. Flexed feet are 0.05 each time. The other deductions listed are up to 0.1
49. b. Her Start Value is 10.0. While she had an acro “E” in the routine, she fell on it, so she is not eligible for 0.1 additional bonus.
50. f. b), c) and d) are correct. Remember, this is an element whose value changed to “D” in this Code!
